

Chemical usage 2004-2007

The information contained herewith relates to all relevant information held on record by the DPIW with respect to chemical usage by Tasmanian salmon marine farms.

Antifoulant usage (litres)	2004*	2005	2006	2007†
Copper based	178202	185764	173075	
Zinc based	7175	2006	910	
Xylene-based thinners (litres)		13120	11430	
Antibiotic Usage (kg)	2004	2005	2006	2007
amoxicillin	0	0	0	550
Chlortetracycline	0	14.5	43	0
oxolinic acid	141.7	0	0	0
oxytetracycline	790	820.3	4446.075	7256.5
Trimethoprim	64.5	14.4	4.08	1.6

* No information relating to 2004 usage of thinners is on record.

† Data specific to 2007 usage rates of antifoulants and thinners is yet to be reported by licence holders.

Reported usage of registered anaesthetic for the period 2004-2007 was 14 litres of Aqui-S.

The above information is specific to marine farming activities and therefore does not include any hatchery data.
